Like '80s Music? Then you'll love THE Original, Authentic C H E M I S T R Y S E T

New CD release, *EXPERIMENTS FROM THE LAB* is culled and remastered from original 4-track and professional studio tapes from 1981-1987. Hear their evolution to a formidable **electronic dance pop band with enormous hit potential.**

Formed in 1981 by **Terry Kennedy** (vocals, keyboards) & **Steve Mecca** (bass, synths, drum programming), the duo turned trio with Mike Reaves (synthesizers, electronic drums) and performed live in NYC/NJ from 1982-84. Their sonic experiments, and positive radio airplay response, earned the pair a track on WDHA's 1985 vinyl release, *New Jersey Rock IV* (Best of Rock Collection).

"Better music through science is what Chemistry Set is all about."

"Performing in lab coats they made the machines come alive." –Asbury Park Press, 1982

"Love Reaction is as big and massive as any hit of that time."

–Marc Urselli, Grammy-winning audio engineer & founder of Chain D.L.K. magazine, 2023

"Chemistry Set is an experiment bubbling over with adventure."

–WDHA Radio, producer of the album, Best of New Jersey Rock IV

To start your listening journey, we recommend the **bubbly theme song CHEMISTRY (Track 3)** and **KING'S GAMBIT (Track 4)** — check out the original 1983 video (QR code below).

(Official Video on YouTube. 16-mm directed by award-winning filmmaker Tony Ceglio & edited by industry pro Howard Ellis).

C H E M I S T R Y S E T

explores power-pop with **LOVE REACTION (Track 10)** and **GIMME SUM SLACK (Track 11)**, plus world-music beats and R&B with **INS/OUTS OF LOVE (Track 7)**.

All songs on the album are clean, and suitable for broadcast with no offensive language.

For programming, *C H E M I S T R Y S E T* fits right in with their **synthpop contemporaries** — early **Eurythmics, Human League, Berlin, Thomas Dolby, Yaz, Thompson Twins** — while sparkling on their own with **distinctive vocals, crafty lyrics, and melodies with a compelling beat.**
