Brief	Collection of restored recordings by <b>Damarge</b> , a 4-piece band from Southend-on-Sea. All recorded between 1981 to 1984.

**Blurb:** CD collects all available recordings of **Damarge**: fully restored and remastered *plus* a region-free DVD with a live performance from 1983 and numerous extras, including a radio interview. **Damarge** had a large and loyal following in their day, but they never fully capitalized on their popularity. Their one and only attempt at recording a single ended in farce. This lovingly curated set comes with a 32-page booklet with detailed band history, track-by-track synopsis and recollections of some eventful gigs. A 2-sided poster with pictures and memorabilia with discs housed in thick LP-style gatefold jacket with inner sleeves. Numbered box set comes with signed letter-press inserts. The band were: **Kirt** (keys, tapes, rhythms), **Oaf** (massive bass), **Cliff** (vocals) and **Snowboy** (Latin percussion). Release images over page ...
